# A SIMPLE STEP BY STEP GUIDE TO YOUR KITCHEN TRANSFORMATION

## Explaining the Kitchen Respray Process

A kitchen respray is a great way to give your kitchen cabinets and surfaces a new and refreshed look. Here is an overview of how a Colour Coats kitchen respray works.

### Preparing the Kitchen for Painting

Before tackling a kitchen painting project, it is important we take the necessary preparation steps. We begin by removing all cabinet doors, drawers, and hardware. Next, we thoroughly clean and sand the surfaces to eliminate any dirt, grease, or old paint.

### Kitchen Protection through Masking Techniques

To maintain a neat and clean environment, the kitchen is masked off using plastic sheets, masking paper, and tape. This precautionary measure guarantees that only the intended surfaces such as end panels, cornices, etc., are sprayed while protecting the surrounding areas.

### Understanding the Importance of Priming

Before painting, it is essential we apply a primer to the surfaces to create a strong bond. This step creates a smooth and even base for the paint, making it easier for the paint to adhere to the surface. In addition, the primer helps the paint adhere better and provides a much more durable finish.

### Spray Painting

The cabinets and surfaces are then sprayed with a high-quality lacquer using our professional spraying equipment. This ensures a durable, hard-wearing coating, giving a professional factory finish.

### Drying and Curing

The cabinets and surfaces are left to dry after the paint application. Once the paint has dried, we remove all masking paper and sheeting, leaving the kitchen clean and tidy. You can resume using your kitchen as you normally would after we leave.

### Handling Items for Refinishing

All items which were removed including doors and kickboards, will be taken to our workshop, and prepared for spraying and completion.

## Re-installation Process

After all necessary work is completed in the workshop and we are satisfied with the results, the next step is cabinet door, drawer, and hardware re-installation. We take care of any necessary adjustments or repairs during this stage, ensuring that everything is up to standard. Finally, all hardware is reinstalled for optimal functionality.

## The Benefits of Spray Painting Kitchen Cabinets and Cupboards

Revamping your kitchen doesn't have to be an expensive project. Rather than replacing the entire kitchen, give your kitchen cabinets, doors, or cupboards a fresh coat of paint with a spray painting technique.

This way, you can retain the original kitchen you spent a fortune on purchasing, with the added benefit of not having to replace the carcasses of the kitchen cupboards since they are usually in good condition.

## Contact us for more information

If you're looking to save money and avoid the hassle of kitchen salespeople and workers in your home, we can offer an alternative solution. Our spray painting technology is top-of-the-line, leaving your kitchen looking brand new without the need for expensive replacements.
